reduction. Pre-emergent herbicides, combined with Curbit herbicide, resulted in fruit counts and total yields similar to the handweeded check. In 2011 and 2012, V10142 and Spartan (neither are registered in cucumbers) applied pre-emergence resulted in excellent weed control with minimal or no injury.

Comments: Herbicides applied postemergence were very injurious to cucumbers and led to severe yield

Fertilization and other pesticides:

Fall 2011 - dairy replacement pack manure, 160 lb N/A.

Irrigation: As needed

Weed Abbreviations:

COLQ = Common Lambsquarters

RRPW = Redroot Pigweed

COPU = Common Purslane

VELE = Velvetleaf
